

Minimum Specifications

Use the following information as a guideline for minimum configurations for running OSAS v7.0 on Pro/5 and BBj in desktop and client/server environments.

The following represents minimum configurations. Using more robust configurations such as increasing memory, increasing processor speeds, and using multiple processors or multi-core processors will improve performance on most systems. Such changes may also be required in networks with more than 8 users, and when the servers and workstations must also handle other processing tasks.

Minimum Specifications

Desktop and Server implementations will run on the indicated platforms using the corresponding level of Java 2 Standard Edition (J2SE). You can run either the Java Runtime Edition (JRE) or the Java Developer's kit (JDK) packages. Windows 98SE, Windows ME, and Windows NT Workstation 4.0 are unofficially supported by Open Systems as client systems only. Other platforms are officially supported. Operating system requirements may differ from OSAS minimum requirements.

CPU Speed is relative to Intel Pentium processor speed. Some processors can achieve equivalent results with slower clock speeds.

* Requires Java 5.0 Update 6 or higher.

** Requires Java 1.5.0 or higher and Power PC only.

*** Requires Java 1.4.2_08 or higher.

**** Requires Java 1.4.2 or higher.

***** Requires Java 1.6 or higher.
